YOUR LOCAL  
SEXUAL HEALTH  
SERVICE

**No need to visit the family planning clinic for repeat prescriptions - the contraceptive pill or patch is available from selected local pharmacies in Hull.**

This is a free confidential service available from selected local pharmacies.

To get your repeat prescriptions for the contraceptive pill or patch from your local pharmacy you will need to:

- Ask the community family planning clinic you normally go to, to give you a letter confirming which pill or patch you are using and that you have no health problems
- Take this letter to the pharmacy so that you can get future supplies when the time comes without delay

Then when you need more contraception, contact the pharmacy to arrange a convenient appointment when the accredited pharmacist is available. Most pharmacies are open on Saturdays and some open late nights and Sunday too.

At the appointment you will have a short private consultation with the pharmacist.

- Your weight, height and blood pressure will be checked
- The pharmacist will ask a few simple health questions to check that the pill or patch is still suitable for you
- If everything is OK the pharmacist will give you a repeat supply of the same pill or patch you are already using

You only need to get a clinic letter once. Book an appointment as above when you need your next repeat supply. The pharmacist can repeat supply for 3 years unless you develop health problems, stop taking your contraceptive for a year or longer, or have a baby.

Pharmacies can also provide advice about safer sex and contraception and many pharmacies provide emergency contraception free of charge.
