

HEPATITIS B

It's 100 times more infectious than HIV!

Did you know...?

It's the only sexually transmitted infection that's preventable by vaccination

Should I have the vaccine?

The vaccine is recommended for the following people:

- Individuals who have 3 or more partners in 6 months
- Men who have sex with men
- Injecting drug users
- Commercial sex workers
- People with HIV and hepatitis C
- Individuals from high risk countries e.g. Asia, Africa
- Workers who come into contact with the above risk groups
- People having tattoos and body piercings
- Sexual contacts of the above groups

**For more details contact
Conifer House on 01482 336336,
www.luvhull.co.uk, www.luveyorks.co.uk
or if you need the vaccinations for work
please discuss this with your employer.**
